Course Description

Emotional Intelligence (EQ) literature shows a strong correlation between EQ and leadership success. This class builds on EQ and explores the development of Spiritual Intelligence (SQ) as defined by the literature and its role in leadership in ministry. Spiritual leaders in all faiths have common characteristics. The aim of this class is to examine these characteristics and their expressions. Strategies are employed to develop leadership skills in self and others for personal development as well as professional development. Specific tools will be introduced and practiced for some of the EQ and SQ skills as they pertain to Unity teachings and leadership in ministry in Unity – in particular for leading through disaster and for digital ministry.

Course Learning Objectives

Upon completion of this course, learners will be able to:

1. Identify and measure personal areas of EQ and SQ strengths and challenges for leadership.
2. Develop and implement strategies for EQ and SQ growth in self and ministry.
3. Articulate and examine EQ and SQ characteristics and their application and development in ministry.
4. Research and design a system for cultivating EQ and SQ maturity in your ministry.
